

## **Job Description: Node.js Developer**

[Company X] is looking for a competent and motivated Node.js developer to join our software development team.

As a Node.js developer, your primary role will be to develop and execute scalable APIs and applications using the Node.js framework. You will create high-performance, efficient web applications that can handle large amounts of data and traffic for our clients.

Your roles and responsibilities as a Node.js developer will also entail working closely with the project development team and supporting designers, project managers, and front-end developers in executing the software solutions.

If you're passionate about software solutions and love working in a fast-paced environment, we invite you to apply. We offer competitive compensation, health benefits, a hybrid work atmosphere, and extensive opportunities for professional development.

### **Objectives of this Role**

- Work on building the back-end applications that power web and mobile applications.
- Develop and implement complex Node.js applications to the cloud infrastructure.
- Design and maintain scalable and efficient APIs and integrate third-party APIs into Node.js applications.

### **Your Tasks**

- Write efficient, transparent, and well-documented code that meets industry regulations and standards.
- Work collaboratively with designers, stakeholders, and product owners to define, design, and

implement new features.

- Participate in performance optimization and tuning of existing Node.js applications.
- Ensure proper adherence to privacy and security standards.
- Stay updated with emerging technologies and trends in Node.js development.

## **Required Skills and Qualifications**

- Bachelor's degree in Software Engineering, Computer Science, or a related field.
- Demonstrable experience in web application development with expertise in Node.js.
- Proficiency with front-end technologies like CSS, HTML, and JavaScript.
- Knowledge of database technologies and agile development methodologies.
- Experience working with databases like MySQL or MongoDB.
- Familiarity with web development frameworks, such as Express.js.
- Understanding of microservices architecture and DevOps principles.
- Excellent problem-solving and management skills.

## **Preferred Skills and Qualifications**

- Relevant certification for Node.js from a recognized organization.
- Experience working with cloud-based infrastructure, such as AWS or Azure.
- Familiarity with front-end development frameworks, such as React.js or AngularJS.
- Working knowledge of test-driven development (TDD).
